DIARIO OFICIAL

[illegible]

```

# Create a new file named test.txt
touch test.txt

# Write the text "Hello, World!" to test.txt
echo "Hello, World!" > test.txt

# Append the text "This is a test file." to test.txt
echo "This is a test file." >> test.txt

# Read the contents of test.txt
cat test.txt

# Move test.txt to a new directory named test_dir
mkdir test_dir
mv test.txt test_dir/

# Remove test_dir
rm -rf test_dir

# Create a new file named test.txt with permissions 755
touch test.txt
chmod 755 test.txt

# Read the permissions of test.txt
ls -l test.txt

```

 MENTOR

Supplemental Figure S10 | **Genomic distribution of the 1000 Genomes Project (2015) SNPs in the human genome.** The horizontal axis represents the human genome in chromosomes (1-22, X, Y) and the vertical axis represents the number of SNPs. The data are presented in a bar chart format, with the height of each bar representing the number of SNPs in a specific genomic region. The bars are color-coded by chromosome: 1 (blue), 2 (orange), 3 (green), 4 (red), 5 (purple), 6 (brown), 7 (pink), 8 (grey), 9 (olive), 10 (teal), 11 (light blue), 12 (yellow), 13 (light green), 14 (light orange), 15 (light purple), 16 (light brown), 17 (light pink), 18 (light grey), 19 (light olive), 20 (light teal), 21 (light blue), 22 (light yellow), X (light green), and Y (light orange). The chart shows a high density of SNPs in the X chromosome and a lower density in the Y chromosome. The data is sourced from the 1000 Genomes Project (2015) and is available at <https://www.1000genomes.org/>.
